Full-gas fun, built for the toughest trails. The E-180 S combines RockShox new ZEB fork with a Super Deluxe rear shock and powerful Code R brakes.

Uncompromised Whyte OTO geometry combined with an ultra-low centre of gravity means outstanding handling, balance and control. A complete eSystem from Bosch means reliability and unbeatable backup. Our "slide in" battery fitment means maximum structural integrity for minimum weight and torsional rigidity.

The high-torque Bosch Gen 4 motor is super-compact with exceptionally smooth power delivery which simulates normal pedalling, and range anxiety shouldn't be an issue as we fit a powerful 625Wh battery as standard. For MY21 the motor torque is improved to 85Nm and the e-MTB mode has many improved features.

The E-180 RS is an exceptionally fun, fast and capable 180mm travel Enduro-focussed mountain bike. Whyte OTO geometry, Fox Factory Suspension and Code brakes make a fantastic MTB package able to get you down the toughest trails in record time - and the motor helps you power back to the top, to do it all again and again.

Uncompromised Whyte OTO geometry combined with an ultra-low centre of gravity means outstanding handling, balance and control. A complete eSystem from Bosch means reliability and unbeatable backup. Our "slide in" battery fitment means maximum structural integrity for minimum weight and torsional rigidity.

The high-torque Bosch Gen 4 motor is super-compact with exceptionally smooth power delivery which simulates normal pedalling, and range anxiety shouldn't be an issue as we fit a powerful 625Wh battery as standard. The E-160 S is available in 5 sizes from XS to XL. The new RockShox ZEB 38mm stanchion forks perfectly complement our proprietary OTO geometry for maximum steering control, and powerful Guide RE brakes keep the easy speed under control.

Uncompromised Whyte OTO geometry combined with an ultra-low centre of gravity means outstanding handling, balance and control. A complete eSystem from Bosch means reliability and unbeatable backup. Our "slide in" battery fitment means maximum structural integrity for minimum weight and torsional rigidity.

The brand new high-torque Bosch Gen 4 motor is supercompact with exceptionally smooth power delivery which simulates normal pedalling, and range anxiety shouldn't be an issue as we fit a powerful 625Wh battery as standard.

Uncompromised Whyte OTO geometry combined with an ultra-low centre of gravity means outstanding handling, balance and control. A complete eSystem from Bosch means reliability and unbeatable backup. Our "slide in" battery fitment means maximum structural integrity for minimum weight and torsional rigidity.

The high-torque Bosch Gen 4 motor is super-compact with exceptionally smooth power delivery which simulates normal pedalling, and range anxiety shouldn't be an issue as we fit a powerful 625Wh battery as standard. For MY21 the motor torque is improved to 85Nm and the e-MTB mode has many improved features.

Each one of our eMTBs delivers more fun in your ride than any other bike we have ever made.

Using the multi-award-winning G-170 as the benchmark, the all-new G-180 frame delivers improvements in every area - the new tube-set offers more torsional stiffness and improved suspension kinematics give better small bump response.

Our 27.5 frame is built around a massive 190mm of front travel, further increasing capabilities. From a local DH trail to extreme Alpine adventures, this bike is ready for everything you can throw at it.

We have designed the geometry of the G-180 to use a 29er fork on both wheel sizes so if you want to mullet the bike, change the lower headset cup and swap in a 29er front wheel.

The default choice of the Whyte Race Team, this bike is built to handle whatever you throw at it - at the pace you need to win. Whether you're riding the world's most extreme EWS courses or your local trails, there's nothing better.

Using the multi-award-winning G-170 as the benchmark, the all-new G-180 frame delivers improvements in every area - the new tube-set offers more torsional stiffness and improved suspension kinematics give better small bump response.

The G-180 is all about the suspension and how it interacts with the geometry. For the Works model we fit the best available suspension components – the ZEB Ultimate fork with Charger 2.1 RC2 damping coupled with the impressive RockShox Super Deluxe Ultimate air rear shock.

New for MY21, the T-160 takes the race-winning pace and exquisitely balanced handling from the benchmark S-150 29er and turns it up to 11 – perfect for today and tomorrow's progressive trail rider.

Combining Whyte's proven OTO geometry with an all-new alloy frame and 150mm of super-refined rear suspension travel, the T-160 promises extended All Mountain capabilities with exceptional speed, control and balance on technical trails.

Shimano 4 pot brakes combined with RockShox suspension gives the new T-160 S total control on every trail you throw it down.

New for MY21, the T-160 takes the race-winning pace and exquisitely balanced handling from the benchmark S-150 29er and turns it up to 11 – perfect for today and tomorrow's progressive trail rider.

Combining Whyte's proven OTO geometry with an all-new alloy frame and 150mm of super-refined rear suspension travel, the T-160 promises extended All Mountain capabilities with exceptional speed, control and balance on technical trails.

As trails progress so do the demands on the suspension. A RockShox Lyrik and Super Deluxe rear shock get you through the rough stuff and Code brakes give you maximum stopping power.

<b>Dropout Code</b>	SRAM UDH

The new T-140 platform is all about maximum fun, wherever you ride. A versatile all-rounder with big-hit capabilities, it combines climbing efficiency with a hooligan attitude to descents, using every bit of its 140mm of suspension travel to keep you grinning from ear to ear.

The T-140 OTO geometry was designed around a shorter 37mm offset fork. The extra front end grip this creates allows us to make the most of the 140mm travel fork, fully exploiting the capabilities of the chassis, the more neutral handling and the 2.6" tyres.

The SR combines our latest geometry and frame tech with RockShox suspension and a Shimano Deore 11 speed drive-train resulting in a massively capable, great value bike.

The S-120 S brings a brand new alloy frame to the line-up which, combined with the new RockShox SID 35 and the new SIDLuxe rear shock, makes the ideal contemporary short travel trail bike - equally at home climbing or descending at speed.

Superb suspension and technical trail handling redefine what you can expect from a 120mm bike, whether you're powering up the climbs, shredding the trail or charging the descents.

The S-120 geometry was designed around a short 44mm offset fork. The S spec features the excellent new stiff but lightweight SID 35.

The S-120 is perfect for the rider that wants speed but still wants to feel the trail beneath them - more of a rally car than a monster truck. Incredibly confident with a voracious appetite for speed, it's an exceptionally versatile all-round MTB using our latest 120mm 29er Trail platform.

Superb suspension and technical trail handling redefine what you can expect from a 120mm bike, whether you're powering up the climbs, shredding the trail or charging the descents.

The S-120 geometry was designed around a short 44mm offset fork – in this case, the exceptional Fox 34 Step Cast platform.

The new 429 sports hardtail comes fitted with a wide 760mm bar, short stem and our Enduro developed V-grips to complement our trail-proven geometry, making it a fantastic introduction to the benefits of Whyte 29er bikes.

This new smooth-welded frame bristles with UK design features such as the 'Get A Grip' seat post clamp system. This allows quick adjustment, fantastic weather-proofing and an ergonomic lever which is easy to operate however cold your hands might be.

The 429 is fitted with Shimano's all new Deore 1 by 10 drive-train for excellent long-term performance and reliability.

With the 901 it's all about the geometry - it will make you feel more confident in all situations than any hardtail you've ever ridden. The latest 901 features exactly the same frame as the 10/10 award winning 905.

The latest 901 comes with the new Whyte Drop.it II Adjust seat post, allowing the rider to tune the dropper post's travel to fit them better with 30mm of available adjustment in 5mm increments.

The all-new Shimano Deore 11 speed drivetrain with a massive 11-51t cassette gives the rider a huge gear range.

The award winning, MBR "Editors Choice" 10/10 905, defines the modern Trail Hardtail. The latest model adds RockShox's new Pike Select RC forks (with Charger RC damper and short 37mm offset) combined with 2.8" tyres to make this 905 the best yet.

The 905 brings ideas directly from our Whyte Enduro team, from the thicker V-Grips to the use of 170mm cranks, which bring the rider 5mm closer to the ground without compromising pedal clearance.

WTB STp i35 35mm wide TCS rims combined with Maxxis 2.8" high volume TR 3C compounds, create more comfort, more grip and more fun.

Our 800 hardtails have always offered a fine blend of fun, control and speed. Our SCR design, with no need for an inner chainring clearance, means our engineers were able to re-shape our custom chainstays for improved agility and a more dynamic ride.

The 800 Series frame uses the very latest Whyte geometry, based around a longer top tube, a short stem and wide 780mm bar. The 800 series bikes also feature a 120mm travel fork, for trail-bike levels of performance.

This latest generation frame bristles with UK design features such as the "Get A Grip" seat post clamp system. This allows quick adjustment, fantastic weather proofing and a nice ergonomic lever which is easy to operate however cold your hands might be.

The 802 is available in the XS size. All sizes have more compact geometry than the 801 or 805. That means slightly less top-tube length for more comfortable reach, suiting riders with shorter proportions.

The 800 Series compact frames use the latest Whyte geometry for confidence-inspiring control. A short stem and wide 760mm bar combine with a 120mm travel fork for trail-bike levels of performance.

Our aluminium hardtails have always offered a fine blend of fun, control and speed. Our SCR design, with no need for an inner chainring clearance, means our engineers are able to further reduce the length of the chainstays for improved agility and a more dynamic ride.

The 800 Series frame uses the very latest Whyte geometry, based around a longer top tube, a short stem and wide 780mm bar.

The BBX internal cable routing keeps cables clean and clear of grime whatever the conditions, while Whyte's surefooted geometry will make you want to ride come rain or shine. It also allows the rider to easily upgrade to the Whyte Drop.it II dropper post.

WTB STP i27 TCS 2.0 System rims with Maxxis TR front and rear specific tyres combine to make a Tubeless Ready package, with enough grip to fully exploit the 800 series trail geometry.

Whyte's design team have given the latest 600 series frame the Trail treatment. A 120mm fork, wider 760mm bar, shorter stem, wider grippier tyres and even our Enduro developed V-grips, make these the most trail-ready bikes in this price category.

You'll find it hard to believe the 603 is Whyte's entry level mountain bike: with carefully chosen, branded parts and a high quality, latest generation frame it has all the hallmarks of Whyte's award winning DNA.

The latest frame bristles with UK design features such as the "Get A Grip" seat post clamp system. This allows quick adjustment, fantastic weather proofing and a nice ergonomic lever which is easy to operate however cold your hands might be.

Our Compact MTBs feature shorter geometry and components to better fit a smaller rider. The 604 may be our entry level model, but with carefully chosen parts and an exceptional frame it remains distinctly Whyte.

Whyte's design team have given the latest 600 series frame the 'Trail' treatment. A 120mm fork, wider 740mm bar, shorter stem, wider grippier tyres and even our Enduro developed V-grips, make these the most trail-ready bikes in this price category.

The latest frame bristles with UK design features such as the "Get A Grip" seat post clamp system. This allows quick adjustment, fantastic weather proofing and a nice ergonomic lever which is easy to operate however cold your hands might be.

We've downsized our maximum confidence Trail geometry and fitted air sprung forks that properly work for lighter pilots so their rides are full of thrills not spills.

The chain-set is sized for shorter legs, a single ring transmission provides simple, instinctive, sequential shifts but still has the gears for every climb and the trigger shifter will help ease the eventual transition in to adult bikes.

The 403 also comes with Whyte's own easy to use Get-a-Grip seat post clamping system allowing the post to be raised or lowered on the trail - even with cold hands.

We've downsized our maximum confidence Trail geometry and fitted air sprung forks that properly work for lighter pilots so their rides are full of thrills not spills.

The chain-set is sized for shorter legs, a single ring transmission provides simple, instinctive, sequential shifts but still has the gears for every climb and the trigger shifter will help ease the eventual transition in to adult bikes.

The 403 also comes with Whyte's own easy to use Get-a-Grip seat post clamping system allowing the post to be raised or lowered on the trail - even with cold hands.

We've downsized our maximum confidence Trail geometry and fitted air sprung forks that properly work for lighter pilots so their rides are full of thrills not spills.

With SRAM NX 1 by 11 spec and a trigger shifter, the 405 really is a scaled down version of our award winning 900 series bikes. We have specced an XSYNC Direct Mount chainring so multiple chainrings are available to tune this bike to the size of the rider.

The 405 also comes with Whyte's own easy to use Get-a-Grip seat post clamping system allowing the post to be raised or lowered on the trail - even with cold hands.

The Dean is an exciting addition to our popular and innovative Gravel range - whether you're looking for a gravel bike for off-road adventures, or a super-hardy utility bike.

With a 2 by 10 Shimano GRX groupset, full hydraulic brakes and tubeless tyres you're getting the latest leading gravel technology, combined with Whyte's acclaimed gravel geometry.

Our brand-new gravel frame is used on the Dean. Available in 5 sizes it features all the luggage points you need for on and off road adventures. If your ride is going to take you further afield then this frame will also accommodate all the bike packing bags, with space for a bottle on the underside of the down tube.

The Friston takes everything we've learnt from MTBs and puts that knowledge into a great value Gravel/Adventure bike package. With hydraulic discs, ground-breaking geometry, SRAM's Apex 1 groupset and a dropper post so you can make the most of its capabilities on steeper descents.

We have applied our unique Whyte frame geometry to the Friston, creating a supremely versatile all-terrain bike. It's equally at home riding your favourite bridle path, winter training or even commuting.

Whyte's straight bladed full carbon fork with its tapered steerer tube and 12mm through axle gives this bike great front end stiffness and steering precision. Combined with an ultra-wide Whyte 500 riser bar which allows the rider to truly exploit the radical geometry.

A truly ground-breaking Gravel/Adventure bike with MTB-inspired geometry, tubeless ready wheels and tyres, hydraulic disc brakes and Shimano's much anticipated new GRX 1x groupset - and a dropper post so you can make the most of its capabilities on steeper descents.

Whyte geometry makes this bike exceptionally competent and controllable off-road. 1 x 11 gearing offers simplicity and efficiency that cannot be rivalled. Full hydraulic disc brakes add stopping power and control.

Whyte's straight bladed full carbon fork with its tapered steerer tube and 12mm through axle gives this bike great front end stiffness and steering precision. Combined with an ultra-wide Whyte 500 riser bar which allows the rider to truly exploit the radical geometry.

The Glencoe combines brand-new our Gravel/Adventure frame with Road Plus tyres. These high air volume 650b tyres have the same rolling circumference as a 700c X 28c setup and give huge levels of comfort and security on even the roughest road surfaces.

1 x 11 gearing offers simplicity and efficiency that cannot be rivalled. The v3 Glencoe is fitted with APEX full hydraulic disc brakes for additional stopping power and control.

Whether you're an inner-city, year-round commuter or a C or D back-road rider, the Glencoe is the perfect bike to give you control on unpredictable surfaces. The Glencoe is the most versatile all-round road bike we have ever made.

The Whitechapel is all about simplicity: a single chain ring and nine gears at the back will give years of reliable urban use.

From an urban commute to an open road adventure, 37c tyres on 23mm wide rims mean speed, comfort and control.

A custom rear dropout mounts the hydraulic disc brake caliper inside the rear triangle clearing the way for a rack or mudguards and our new urban chain stays feature a useful kickstand mount.

Based on our high performance mountain bike geometry, all our Fast Urban bikes have a long wheelbase and relaxed head angle for high speed stability and a shorter stem for excellent slow speed manoeuvrability.

Featuring mountain bike clutch mech technology and the excellent Deore 11-42 wide range cassette, the Shoreditch has the right gear for any ride.

From an urban commute to an open road adventure, 37c tyres on 23mm wide rims mean speed, comfort and control.

Combining MTB geometry and parts with road bike wheels and tyres has always been the case with the R-7 line up - but Plus tyres take this to a new level. These high-air volume/low-rolling-resistance tyres are perfect for dealing with 'All Surface' commutes and rides.

The Portobello features massive 650b x 47c tyres to smooth out the road chatter. These deep profile tyres have the same rolling diameter as 700c x 28c tyres, but the extra air volume make them super comfortable and pinch puncture resistant.

A custom rear dropout mounts the hydraulic disc brake caliper inside the rear triangle clearing the way for a rack or mudguards and our new urban chain stays feature a useful kickstand mount.

Lightweight 1x11 speed transmission provides reliable sequential shifting simplicity and a wide gear range.

Road chatter is smoothed out by 37c tyres combined with the carbon fork which has dropout eyelets, allowing our custom mudguards to be easily fitted.

A custom rear dropout mounts the hydraulic disc brake caliper inside the rear triangle clearing the way for a rack or mudguards and our new urban chain stays feature a useful kickstand mount.

Using Shimano's STEPS e-Bike Drive Unit the Coniston is able to take advantage of the pedal assist without compromising the weight distribution and therefore the handling.

Our custom built e-Bike frames are loaded with unique design touches and British weatherproof features - such as the forward facing seat slot, continuous outer cables that keep the gear shifts working smoother for longer and optional custom matched mud guards.

The ride-feel of these e-Bikes is second to none, with a fantastic quality lightweight frame which includes our uniquely shaped rear seat stays for comfort and performance, plus Whyte's very own take on All Terrain geometry.

Using Shimano's STEPS e-Bike Drive Unit the Clifton is able to take advantage of the pedal assist without compromising the weight distribution and therefore the handling.

The Clifton comes fitted with 650b wheels and 47c RoadPlus, WTB Byway tyres offering greater comfort, better grip and increased security on rough urban roads and light off-road rides.

Integrated lighting, controlled from the STEPS head unit gives fingertip control of the lights for year-round usage. These powerful lights make night riding easy and can also be used as daytime running lights for extra visibility

Using Shimano's STEPS e-Bike Drive Unit the Highgate is able to take advantage of the pedal assist without compromising the weight distribution and therefore the handling of this compact fit bike - ideal for a smaller rider, or one who prefers a more upright riding position.

The Highgate comes fitted with 650b wheels and 47c RoadPlus, WTB Byway tyres, offering greater comfort, better grip and increased security on rough urban roads and light off-road rides.

Integrated lighting, controlled from the STEPS head unit gives fingertip control of the lights for year-round usage. These powerful lights make night riding easy and can also be used as daytime running lights for extra visibility

The Hoxton takes our winning Fast Urban formula of MTB geometry, rugged reliability and road plus wheels and integrates the super-stealthy Fazua Evation system.

Stylish tan wall tyres give this city bike a real contemporary look and the high air volume comfort they add takes the sting out of even the roughest roads. It's never been easier to cut across town - enjoying a Whyte eBike tailwind all the way.

We've been careful not to compromise our geometry formula by fitting drive units or batteries and have designed our eBikes to feel and handle like our award winning mechanical bikes - with range extending, climb flattening Fazua assistance on hand when you need it most.

The Winchelsea combines our Glencoe Road Plus bike with the Fazua eBike system to create a super stylish road bike that will take you on road and path adventures with a little help when you need it.

1 x 11 gearing offers simplicity and efficiency that cannot be rivalled. Full Hydraulic brake will give you braking control and consistent modulation whatever the weather.

We've been careful not to compromise our geometry formula by fitting drive units or batteries and have designed our eBikes to feel and handle like our award winning mechanical bikes - with range extending, climb flattening Fazua assistance on hand when you need it most.

A truly ground-breaking Gravel/Adventure E-bike with MTB-inspired geometry, tubeless ready wheels and tyres, hydraulic disc brakes and SRAM's Rival 1 groupset, paired to the Fazua e-Bike motor with a 350Wh battery.

Using high air volume 650b x 47c tyres the Gosford makes light of both rough road surfaces and bridle path excursions. Whether heading out for a summer off-road ride or a mid-winter blast, the Gosford give the rider year-round, all-round power-assisted flexibility.

We've been careful not to compromise our geometry formula by fitting drive units or batteries and have designed our eBikes to feel and handle like our award winning mechanical bikes - with range extending, climb flattening Fazua assistance on hand when you need it most.
